FROM THE PRINCIPAL'S DESK

At the outset, I express my gratitude to the parents who have put their faith in us to educate their children. This brings with it tremendous responsibilities and I assure you that we are doing our best to live up to your trust in us.

Today, the role of a school is not only to pursue academic excellence but also to motivate and empower the students to be lifelong learners, critical thinkers, and productive members of an ever changing global society. Converting every individual into a self-reliant and independent citizen, our school provides an amalgam of scholastic and co-scholastic activities.

This school magazine gives opportunities to the students to showcase their creativity in the form of stories, articles, poems, anecdotes and so on.

The theme for the first Volume of this academic year is 'Time Travel Adventures,' which has given the students a chance to travel back in time to a historical event or learn about a figure in a fun and creative manner. I congratulate the entire team for their hard work and dedication to making this magazine.

I am sure that the positive attitude, hard work, sustained efforts and innovative ideas exhibited by our young children will surely stir the minds of the readers and take them to the fantastic world of sheer joy and pleasure.

"Education is a shared commitment between dedicated teachers, motivated students and enthusiastic parents with high expectations"

Regards,
Mr. Bhushan Upasani
Principal

Let's understand time travel

The ability to jump forward and backwards in time has long fascinated science fiction writers and physicists alike. So is it really possible to travel into the past and the future?

Is Time Travel Possible?

The Short Answer: Although humans can't hop into a time machine and go back in time, we do know that clocks on airplanes and satellites travel at a different speed than those on Earth.

We all travel in time! We travel one year in time between birthdays, for example. And we are all traveling in time at approximately the same speed: 1 second per second.

When we think of the phrase "time travel," we are usually thinking of traveling faster than 1 second per second. That kind of time travel sounds like something you'd only see in movies or science fiction books. Could it be real? Science says yes!

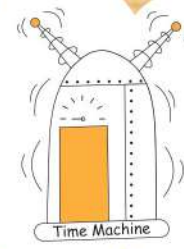

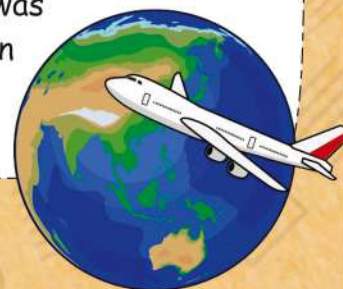

How do we know that time travel is possible?

More than 100 years ago, a famous scientist named Albert Einstein came up with an idea about how time works. He called it relativity. This theory says that time and space are linked together. Einstein also said our universe has a speed limit: nothing can travel faster than the speed of light (186,000 miles per second).

What does this mean for time travel? Well, according to this theory, the faster you travel, the slower you experience time. Scientists have done some experiments to show that this is true.

For example, there was an experiment that used two clocks set to the exact same time. One clock stayed on Earth, while the other flew in an airplane (going in the same direction Earth rotates).

After the airplane flew around the world, scientists compared the two clocks. The clock on the fast-moving airplane was slightly behind the clock on the ground. So, the clock on the airplane was traveling slightly slower in time than 1 second per second.

Can we use time travel in everyday life?

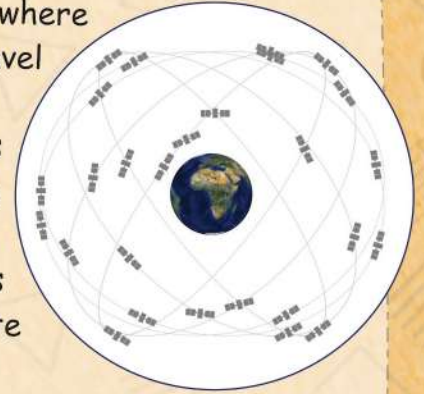

We can't use a time machine to travel hundreds of years into the past or future. That kind of time travel only happens in books and movies. But the math of time travel does affect the things we use every day.

For example, we use GPS satellites to help us figure out how to get to new places. NASA scientists also use a high-accuracy version of GPS to keep track of where satellites are in space. But did you know that GPS relies on time-travel calculations to help you get around town?

GPS satellites orbit around Earth very quickly at about 8,700 miles (14,000 kilometres) per hour. This slows down GPS satellite clocks by a small fraction of a second (similar to the airplane example above).

However, the satellites are also orbiting Earth about 12,550 miles (20,200 km) above the surface. This actually speeds up GPS satellite clocks by a slighter larger fraction of a second.

(Picture of GPS Satellites orbit around Earth)

Here's how: Einstein's theory also says that gravity curves space and time, causing the passage of time to slow down. High up where the satellites orbit, Earth's gravity is much weaker. This causes the clocks on GPS satellites to run faster than clocks on the ground.

The combined result is that the clocks on GPS satellites experience time at a rate slightly faster than 1 second per second. Luckily, scientists can use math to correct these differences in time.

If scientists didn't correct the GPS clocks, there would be big problems. GPS satellites wouldn't be able to correctly calculate their position or yours. The errors would add up to a few miles each day,

which is a big deal. GPS maps might think your home is nowhere near where it actually is!

To summarise, we can say that yes, time travel is indeed a real thing. But it's not quite what you've probably seen in the movies. Under certain conditions, it is possible to experience time passing at a different rate than 1 second per second. And there are important reasons why we need to understand this real-world form of time travel.

If I met someone from the past...

Einstein

If I met the Queen of Jhansi , it would be a fascinating opportunity to ask her a few questions like

"What inspired you to lead your people in the battle against the British ?"

"What were the most significant challenges you faced as a ruler ?"

"What role did women play in your army?"

"How did you navigate alliances during the uprising?"

Or maybe explore her vision for the future of India and what she hopes for her people post independence, discuss her views on the importance for preserving the Indian culture and traditions during colonial times , discuss her interests in art , music and literature of her time , ask about her innovative strategies and how she adopted changing circumstances during the revolt .

Disha Patil
VIII RAMAN

If I had the opportunity to meet J.R.D. Tata, the pioneer of Indian industry, I would express my deep admiration for his visionary leadership and immense contributions to India's economic and social development. One of the first things I would appreciate him for is his pioneering role in founding Tata Airlines, which later became Air India, making India a key player in the global aviation sector. I would also acknowledge his efforts in establishing Tata Motors, Tata Steel, and other industries that laid the foundation for modern industrial India. I would be keen to ask him about the challenges he faced in building such a vast and diverse empire during a time when India was still under colonial rule and post-independence when the economy was nascent. I would also be curious to know how he balanced his deep sense of social responsibility with the aggressive growth strategies needed for business expansion. His belief in ethical business practices and his focus on employee welfare and education are areas where I would seek his insights, particularly how he managed to maintain profitability while prioritizing the greater good. Lastly, I would appreciate his progressive thinking and emphasis on innovation, which still serves as an inspiration for Indian entrepreneurs and industrialists today.

If I met someone from the past...

Einstein

If I met the Maratha Warrior and founding ruler of the Maratha empire in western India. Yes, "Chhatrapati Shivaji Maharaj"

If I would meet him I would Firstly touch his feet and get his blessings. I would introduce myself and would like to tell him that, he is my idol and I love to listen to his stories about his bravery and tenaciousness, about winning and extending his empire, which give us goosebumps while listening about all this . The first question I will ask , "Is there any difference between the lives we live and the life he lived? What was his last wish and thoughts before leaving this world? Who was his biggest enemy? The most important question, how did he motivate his soldiers going for a war? And last, if he wants to give any message, for the youth of 21st Century? I would like to tell him that it was great meeting him, and I love to study and learn about his achievements.

Swara Patil .
VIII RAMAN

If I get an opportunity to meet Mahatma Gandhi who was a great freedom fighter. I will introduce myself .

I would like to ask him some questions. My first question would be that if not a 54freedom fighter what else would he want to be because I wonder about it at times . My next question would be that, "How was he known to be as "Bapu" as we get no idea about it in our history textbooks and my last question would be that what struggle he had faced in making India independent . Rather than questioning I would also like to see his charkha which he used . Because I saw that the charkha is fully made up of wood which makes it so interesting. And at the last I will say thank you for being so courteous.

Did you know?

Egyptian Civilization

Most Ancient Egyptian pyramids were built as tombs for pharaohs (rulers of Ancient Egypt) and their families. To date, over 130 pyramids have been discovered in Egypt.

The Pyramid of Khufu at Giza is the largest Egyptian pyramid. It weighs as much as 16 Empire State buildings.

The Ancient Egyptians invented lots of things we still use today, such as paper, pens, locks and keys and - believe it or not - toothpaste!

Cats were considered sacred animals by the Ancient Egyptians. Most families had a pet cat, which they believed would bring the household good luck!

Ancient Egyptians believed in more than 2,000 deities! They had gods for everything, from dangers to chores! Each God had different responsibilities and was worshipped so that life could be kept in balance.

Indus Valley Civilization

The city of Mohenjo-Daro was prone to flooding. Archaeologists have discovered that this ancient city was rebuilt seven times due to flooding.

The people of the Indus Valley created beautiful works of art out of metal, such as the famous Bronze 'Dancing Girl of Mohenjo-Daro' statue.

The people of the Indus Valley civilisation traded things like cotton, metals and exotic animals with the people of Ancient Mesopotamia.

In Mohenjo-Daro, the biggest structure found was a large communal bath called 'the Great Bath'.

It is believed that the people of the Indus Valley civilization invented buttons - they were made out of seashells!

Mesopotamian Civilization

Mesopotamia was the home of the Sumerians, who were the first to develop a standard writing system called cuneiform.

The city of Uruk is said to have had around 50,000 citizens at one point, which was a massive population for its time.

The invention of the wheel is credited to the Sumerians. The wheel they developed was used for Pottery and its first use for transportation was 300 years later.

Mesopotamians developed glass, the Pythagorean Theorem, and ancient sanitation techniques.

Concepts such as the empire, the city, and the demarcation of hours, minutes, and seconds are all first attributed to Mesopotamia.

If I find a time machine...

If I had a time machine, I would go back in time and experience historical events. I would witness the construction of Taj Mahal and many other historical monuments. I would also witness the signing of the declaration of Independence or the first moon landing. I would also travel to the future and see what the world would be like after 50 or 100 years. However, time travel could also have serious consequences. Changing the past, could alter the present, and the future may not be what you expected. Additionally travelling through time could have unintended, onsequences on the space time continuum, which could have disastrous effects on the universe.

Khushi Upadhyay
III LOTUS

If I had a time machine, I would like to have a sneak peek into my future. I would like to see what I am doing in my personal and professional life at the age of 25, 50, 40, 60 and 80. That will decrease my apprehensions and uncertainties of future. But I would like to spend my time in past rather than in future, as I want to keep that curiosity and secrecy of future alive. As far as past is concerned, I would like to relive all my happy and favourite moments. I would go back and spend time with my grandfather. I would relive my happy moments with friends. I would love to revisit the beautiful places I visited and achieved peace & happiness. By reliving my favourite moments in the past, I will feel happy, confident and peaceful in the present. This will give me the positive energy and confidence to live my life in the future.

Aniya Khairnar
VII RAMAN

If I ever find a time machine, I would go back to 2014. It was a time when I was just 4 years old and enjoying my childhood. It was the time when my life was stress free. I would be pleased to meet my younger self. I will re-live the life which I certainly miss a lot these days, as in 2024 my life has become too hectic and busy. I want to live my childhood once again. I would love to enjoy my childhood games with my old friends who are not in touch with me. I want to meet my old friends who supported me a lot back then and they disappeared like we never had met.

Arushi Savaji.
IX KALAM

Time Machine is such a wonderful thing. It takes us in past and lets us see the future beings. It will be loads of fun to see dinosaurs and toads. With every era a tale unfolds Legends, Warriors and things untold. We can peek into future but be careful about what's in the store!

Shanaya Mankar
III ROSE

If I have a time machine, I will bring back the days when I was free as the wind, when everyone was so fine and innocent. I will bring back the days when everyone had a smile on their face, when everyone was kind and when we just lived for fun,

Samiksha ubey.
III ROSE

If I find a time machine...

If I find Time machine I would travel to the future . In the present the pollution caused by the industries and greed of humans towards development has increased . In future this can cause upto the end of humanity and well the flora fauna . With the help of time machine I would travel to the future to see the status of pollution that could cause many consequences such as , in future the rainy season would be the threatening season for humans because the increased pollution would cause acid rains . This acid rain water is very harmful for us as it would fill acidic water in water bodies , which could destroy the marine life and disturb the ecological cycle . After witnessing this I will come back to the present and alert people about the consequences they would face in future such as I would suggest them to decrease the industrial pollution now as much as they can , as it can decrease the chances of rainy season not to be threatening. I will also suggest them to dispose the waste properly . By practicing all these we can save the future of the Earth and their future generations. I think this would be the best way to use a time machine .

Muhammed Teli
V Raman

If only I can turn back time , I could save all my dimes , pass my tests , find all my lost items . See everytime that's left right behind . If only I had not been so foolish , my popularity would take a huge leap . If I can turn back time , I would turn back times that I have been happy , and not those which are so happy . Only if I find a time machine .

Ravya Sisodiya
III ROSE

Imagine if I had a time machine . What would I do ? I'd travel back in time to witness history's greatest moments and learn from the wisdom of past generations. I'd explore the future to see how our world evolves , discovering solutions for day's challenges . But with this power comes great responsibility. Should we change the past, knowing it could alter everything? Instead , I'd use this time machine to better understand history and the future , bringing insights To improve the present .While I may not have a time machine , we all have the power to shape the future through our actions today . Let's make each moment count , honouring the past and building a better tomorrow.

Parnavi More.
IV ROSE

Firstly I would go back in time to those days when I had been mortified and embarrassed and try to alter it for the better . Next , I would go back to when things weren't so costly as today . I would treat myself to hordes of cheap chocolates and ice creams ! I would also go back to famous historical events to see how things were and try to see if I can stop something like a war . However , If possible I would return to my childhood days and try to be stuck there!

Atharv Lokhande
I Jasmine

A Ruler from the past I admire...

The Ruler who I admire is Maharana Pratap Singh Popularly known as Maharana Pratap. He was the king of the kingdom of Mewar, in north- western India in the present-day state Rajasthan. Maharana Pratap, being the most prominent ruler In India. He was known for his military resistance against the growing might of the Mughal Empire. He is also known for the Battle of Haldighati, Battle of Dewair and for defeating the Mughal king Akbar thrice in 1577, 1578 and 1579. The biggest thing that I admire about him is that he was a standalone fighter and he never bent down to any temptation. Maharana Pratap was one of the strongest warrior in India. He was 7 ft 5 inches tall and carried a 80 kg spear and two swords that weighed around 208 kg. He also wore armors that weighed Valour 72 kg6. Maharana Pratap was a symbol of valour, bravery and dedication.

Parth Bagal
8th Raman

The Ruler I admire is Ashoka The Great. He was the third ruler of the Maurya dynasty and was one of the most powerful king in ancient times. His empire was founded by Chandragupta Maurya, who was the grandfather of Ashoka. He reigned between 273 BC and 232 B.C. He was born to Mauryan king Bindusara and queen Devi Dharma. Ashoka was the most famous and unique ruler because he was the first ruler who tried to spread his message through inscriptions to the people. Ashoka is the only king in the world's history who gave up the conquest even after winning a war. He started to follow a religious policy of his own after the violence and blood shed held in kalinga War and formulated various policies of Dhamma. Ashoka the Great made justified contributions to the art as well as architecture. He built stupas at Sanchi, Sarnath, Deor, Kothar etc. He also made significant contributions to the Nalanda University and Mahabodhi temples. He was troubled with numerous issues of animals, ill-treatment of slaves and servants. He had made provisions in regard to medical facilities for both humans and animals.

Yati Abhay Agrawal
VIth Kalam

The Ruler I admire is Chatrapati Shivaji Maharaj. The pioneering architect of the Maharatha Empire, is my ultimate inspiration. His groundbreaking vision, strategic prowess, and disruptive innovation revolutionized India. Born in 1630, Shivaji unified the Maratha clans, boldly challenging systemic oppression. His fearless confidence, infectious charisma, and unwavering resilience earned him fame. He championed inclusive growth, empowering marginalized voices. His forward-thinking governance ensured equitable taxation and seamless administration.

Nipun Singavi
VI Vikram

A Ruler from the past I admire...

I admire Chhattapati Shivaji Maharaj because of his leadership and vision. He founded the Maratha Empire and demonstrated exceptional leadership skills, uniting diverse groups under a common cause. He was a master tactician who employed guerilla warfare strategies, which were innovative for his time and effective against larger forces. He promoted Marathi culture and language, advocating for a secular state and ensuring safety for various communities. Shivaji Respected all religions, fostering a sense of identity among all people. Shivaji symbolises resistance against oppression, inspiring countless others in the struggle for freedom and self determination. He valued women's role in society including appointing them for important roles within his kingdom, showcasing progressive values for his time.

Aryan Nyahalse

VI VIKRAM

I admire Chandragupta Maurya (340 - 298 BCE). He was one of the ancient India's most influential rulers for finding the Maurya Empire and uniting the Indian subcontinent under one rule. His rise to power is a fascinating tale of strategies and visionary leadership. Born into a humble background, with some sources suggesting he came from a low caste warrior tribe. His early life was shaped by his mentor Chana Kya a brilliant strategical, economist and philosopher. Chanakya, also known as Kautilya had a deep desire to overthrow the corrupt Nanda Dynasty of Magadha and saw the potential in the young Chandragupta to fulfill this mission. Under Chankya's guidance, Chandragupta assembled an army and successfully toppled the Nandas, marking the beginning of the Maurya Empire around 321 BCE. This victory was just the start of his journey as the king. He then embarked on a campaign to expand his empire, uniting vast territories across Northern and Central India.

Sumedh More

VI KALAM

The ruler I admire the most Rani Lakshmi Bai who is also known as the Queen of Jhansi, She was a Courageous Indian warrior queen who played a significant role during the Indian Rebellion of 1857 against British rule. She was born in 1828 in Varanasi. She became proficient in horse riding, sword fighting and archery. Her education and upbringing instilled in her a sense of independence and determination, which would later define her as the Queen of Jhansi. She is known for her courage and bravery during the 1857 revolt against Britishers. She was the first woman freedom Fighter who stood for her rights and fought for India's freedom. Everyone admires her for her bravery and the way she fought for herself and for her country. This battle was known as the first battle of Independence. She inspires as about bravery and also told that we have the rights to fight for ourself no matter what. She died as a hero at the young age of 29 and she was amongst the most contributing characters.

Imagine being at the Egyptian Pyramids, and suddenly, the Egyptian Mummy comes to life and greets you with a "hello." What would your conversation be?

If I met a Pharaoh

As I stood in awe before the Egyptian Pyramids, something incredible happened—a mummy wrapped in linen suddenly stirred to life and greeted me with a cheerful "Hello!" It was Pharaoh Khufu himself! He began to share stories of his life before his death. "I was born into royalty," he explained, "and from a young age, I knew I was destined to lead." He talked about his father, Pharaoh Snefru, who taught him about leadership and responsibility.

Khufu ruled during the Fourth Dynasty, a time of great prosperity. "I focused on agriculture, making sure the Nile's floods benefited our lands," he said. He emphasized the importance of unity among the people, noting that he built strong relationships with nobles and priests to maintain peace.

He shared important events from his reign, like the construction of the Great Pyramid, which he called his greatest achievement. "It stands as a symbol of our strength and ambition," he said proudly. He also initiated trade expeditions that brought valuable resources to Egypt, boosting the economy.

Khufu's reign shaped the future of Egypt. "The pyramid not only served as my tomb but influenced generations of builders," he reflected. As he spoke, I felt the weight of history and the lasting impact of his leadership on Egypt.

Harsheeta Chavan
IX Kalam

Hello! I am Pharaoh 'Akhenaten', who reigned from 1353 to 1336 BCE, I introduced the worship of Aten, the Sun Disk to people and leading a decline on to traditional God. The Major event that happened in my kingdom was moving to a new capital of kingdom from Thebe to Akhetaten , the thing that I liked that people should praise me like a god and follow my orders given to them . I was not cruel to them but like every other king or Pharaoh I also liked to give orders. With time my religious reforms strained . My relations with neighboring kingdoms ,strained as I was focusing on Aten and a new capital that diverted resources and almost emptied my treasury .This led to dissatisfaction among my people. In my period some saw a shift in artistic style that reflected my religious ideologies for the better understanding of the people but on the other hand I faced some criticism from people, my later years marked the uncertainty about succession , particularly concerning my heir ,who was Tutankhamun . After my death , many of my reforms were reversed , and my name was erased from the historical records. As a result in the historical records only some of my actions are mentioned in the history and my name vanished from Egypt .

Prathmesh Isai
IX Raman

Imagine being at the Egyptian Pyramids, and suddenly, the Egyptian Mummy comes to life and greets you with a "hello." What would your conversation be?

Standing before the magnificent Egyptian pyramids, I feel a thrill in the air, a mix of history and mystery. Suddenly, the ground shifts, and out of the golden sands emerges a figure—Pharaoh Tutankhamun, resplendent in fine linen and gleaming gold.

"Welcome," he says, his voice rich and powerful. "I am Tutankhamun, the boy king." I'm mesmerized as he gestures toward the towering pyramids. "These stones are not just monuments; they are gateways to eternity. I became pharaoh at just nine years old, shouldering the weight of a nation."

As he speaks, I'm transported to his time. He shares tales of grand feasts and sacred rituals, revealing the treasures that filled his tomb—golden masks, jewelled chests, and chariots meant to carry him into the after life. "My reign aimed to restore the worship of Amun," he explains. "But my life was filled with both wonder and tragedy."

His laughter rings out like music as he recounts friendships and the shadows that loomed over his reign. "Though my time was brief, my legacy lives on in the hearts of those who remember me," he reflects, a hint of sadness in his eyes.

As the sun sets, painting the sky in hues of orange and purple, I feel an overwhelming sense of connection to this young king. "Cherish every moment," he advises, his gaze steady. "Each moment is a story waiting to be told."

With that, he begins to fade, but his words linger in the air, wrapping around me like the sands of time. I stand alone once more, the pyramids towering above me, forever changed by the glimpse into the life of a pharaoh who continues to inspire awe across the ages.

Title of the Movie/Book:

Mummies Unwrapped

Movie/Book Summary:

It presents a fascinating portrayal of what was behind the process of ancient mummies. There's a lot to love about this non-fiction factual account of one part of ancient Egypt. This book also includes how the dead body was mummified. There are little-known facts which are included in 'mummy mistakes'. This book is mostly suitable for fifth or higher graders. I strongly recommend reading this book.

"When we became Humans"

Movie/Book Summary:

"When We Became Humans" offers an insightful exploration of human evolution, examining key milestones that distinguish us from other species, such as the development of language, culture, and social structures. The author skillfully blends scientific research with engaging anecdotes, making complex ideas accessible to readers. Key themes include the nature of consciousness and the impact of our evolutionary history on contemporary society, prompting reflection on what it means to be human. Overall, it's a thought-provoking read that invites both scientific curiosity and philosophical inquiry, making it a valuable addition for anyone interested in anthropology or the human experience.

How many hearts will you give to this movie?

(1 heart means the movie was really bad 5 hearts means it was great!)

Title of the Movie/Book:

ALIENOID

Movie/Book Summary:

Alienoid is a South Korean sci-fi action movie that mixes time travel, aliens, and ancient warriors. The story jumps between the Goryeo Dynasty and the present day, where a group of aliens are imprisoning their kind inside human bodies. The plot can be a bit confusing because it combines a lot of different elements, but the action scenes are exciting and well done. The special effects are impressive, and the movie has a unique blend of humour, adventure, and fantasy. However, the complex storyline might be hard to follow. Overall, it's a fun, visually stunning movie but requires some attention to keep up with the plot.

Find your way to the Pharaoh through this maze.

Time Travel Crafts

DIY Time Capsule

Step 1 - Choose a container for the time capsule.

Step 2 - Assemble your contents to be put into the container such as -

- ~ A letter for your future self
- ~ Family photo
- ~ Toys
- ~ Goals and aspirations
- ~ Anything you would like to give your future self

Step 3 - Put all your assembled things inside the container.

Step 4 - Seal the container and write your name or year on it.

Step 5 - Find a location to bury/hide the time capsule container.

Step 6 - Click a picture of where you'll hide the container and then hide it.

DIY Pharaoh Mask

Things required to make the mask

- ~ Cardboard paper or any thick paper
- ~ Glue
- ~ Sketch-pens
- ~ Colour paper or colours

Can you solve this riddle?

“There is an ancient invention still used in some parts of the world today that allows people to see through walls.”

Answer: Window

An Ancient Recipe

Imagine had you been washed ashore four millennia ago on the banks of the now lost river of Saraswati and hitched a bullock cart ride to Farmana in the Ghaggar valley near modern-day Delhi, here's what you might have eaten - a curry.

Here is the 4000 year old 'original' curry recipe from the Indus Valley Civilization.

Ingredients

- > 6-7 small brinjals, washed and slit
- > 1-inch piece of ginger (paste)
- > 1 fresh turmeric paste, or $\frac{1}{4}$ tsp turmeric powder
- > Salt
- > 1tbsp raw mango cut into cubes
- > 2-3tbsp sesame oil
- > $\frac{1}{4}$ tsp cumin
- > Sugar to taste

Method:

Wet grind the ginger, turmeric and cumin seeds. Heat sesame oil, add the paste and cook for a couple of minutes. Tip in the brinjal, add some salt and give it a good stir. Cover and cook until the brinjals are nearly cooked through; add some water, if need be. Now, stir in the mango and sugar. Simmer for a few minutes or until the mango is cooked. Check seasoning and serve with bajra roti (pearl millet flatbread).
